

term	number
phosphorelay signal transduction system	1
response to osmotic stress	2
response to external stimulus	3
pollination	4
salicylic acid mediated signaling pathway	5
ethylene-activated signaling pathway	6
response to organonitrogen compound	7
phosphorylation	8
peptidyl-amino acid modification	9
RNA biosynthetic process	10
cellular response to drug	11
benzene-containing compound metabolic process	12
defense response to other organism	13
regulation of RNA biosynthetic process	14
