

score

3.5

1.5

	term	num
2	defense response to oomycetes	1
	regulation of transcription, DNA-templated	2
	protein dephosphorylation	3
	sphingolipid metabolic process	4
	response to osmotic stress	5
	cell surface receptor signaling pathway	6
	aromatic amino acid family catabolic process	7
	ethylene-activated signaling pathway	8
	inflorescence development	9
	regulation of salicylic acid metabolic process	10
	antibiotic biosynthetic process	11
	benzene-containing compound metabolic process	12
	interaction with symbiont	13
	regulation of stomatal closure	14
2	inorganic ion transmembrane transport	15
